The leading edge technology features a high flow rate of people through the gate with the minimum number of nuisance alarms, as personal items such as coins, keys and belt buckles can pass through the magnetic field without causing an alarm.

The Classic Metal Detector is compact and lightweight, making this portable unit adaptable to any surroundings. The patented cylinder design is aesthetically suitable for the most discrete applications.

This security equipment does not require any special training for normal use, the most "user friendly" walk-through metal detector in the industry.

CEIA Metal Detectors have been selected by leading security agencies worldwide to protect high-ranking government officials. The Classic conforms to all International Security Standards and is capable of detecting both magnetic and non-magnetic weapons.
