

# SmartTech®

24/7 ACCESS TO BOMB EXPERTS FOR SUSPICIOUS PACKAGE  
RESOLUTION INTEGRATED INTO HI-SCAN X-RAY SYSTEMS

## Feature Highlights

- 24/7/365 remote access to expert bomb technicians
- Audio and video high-speed connection
- Integrated into HI-SCAN X-ray systems
- Eliminate unnecessary facility evacuations
- DHS Safety Act Certified

SmartTech®, provided in conjunction with Michael Stapleton Associates (MSA) of New York, is a high-speed, remote two-way video and audio system integrated into Smiths Detection HI-SCAN X-ray screening systems.

Screeners using HI-SCAN X-ray systems equipped with SmartTech® can instantly transmit suspect images of possible threats to the MSA Command Center. MSA bomb technicians, on alert 24/7, analyze the images and provide immediate interpretation and verification to the operator in real-time.

MSA bomb technicians include experts from elite law enforcement agencies such as the NYPD Bomb Squad, have specific training in X-ray interpretation to identify improvised explosive devices (IEDs) and are graduates of the FBI Hazardous Devices School (HDS).

SmartTech® is DHS certified under the Anti-Terror Technology provision of the Safety Act. MSA, established in 1987, is the only explosive detection security company in the United States that provides clients liability coverage in the event of a terrorist attack.
