

# model SU2000-SM

Optical turnstiles from Alvarado provide secure bi-directional entry control, while blending beautifully with high end environments. Ideal for use in supervised lobbies, optical turnstiles use integrated sensors to control access, detect unauthorized entry attempts, and “tailgating” on allowed entries. Sounds and lights alert when an unauthorized passage is attempted.

The Supervisor 2000-SM is our thinnest barrier-free turnstile. Its compact form is well suited for applications where space is at a premium.

## COMMON APPLICATIONS

- Interior Entry/Exit Control
- Time & Attendance Integration
- People Counting

## Why Alvarado?

Alvarado is the leading manufacturer of optical turnstiles. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world.

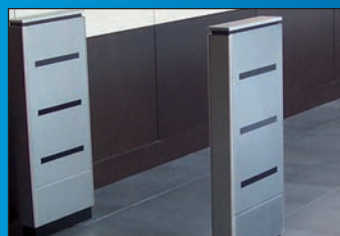

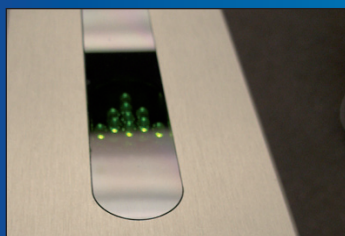

Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.

### KEY FEATURES

- No Barriers
- Stylish Design, Small Footprint
- Superior Optical Detection
- Clear Direction to Users
- Alarm Contact Outputs
- Easy Systems Integration

### BENEFITS

- Barrier-free design utilizes optical sensors to monitor passage through the lane resulting in **very high throughput rates**
- Compact cabinets look great, are unobtrusive and **provide access control where space is at a premium.**
- Integrated sensors monitor passage, **detecting unauthorized access and "tailgating" behind an authorized user.**
- Illuminated status lights on top of the cabinet and audible alerts **convey lane status and alarm conditions.**
- Alarm contacts may be **integrated with remote systems to provide alarm notifications.**
- Easily integrates with most access control and safety systems.**

### AVAILABLE MODELS

SU2000-SM - Single Lane (2 cabinets) - 28" and 36" lane widths

### OPTIONS

A number of options and a selection of materials and finishes are available.

### COMPLEMENTARY PRODUCTS

Custom barriers are ideal companions to our optical turnstiles. They can fill gaps in your installation, direct pedestrians and provide an integrated appearance.

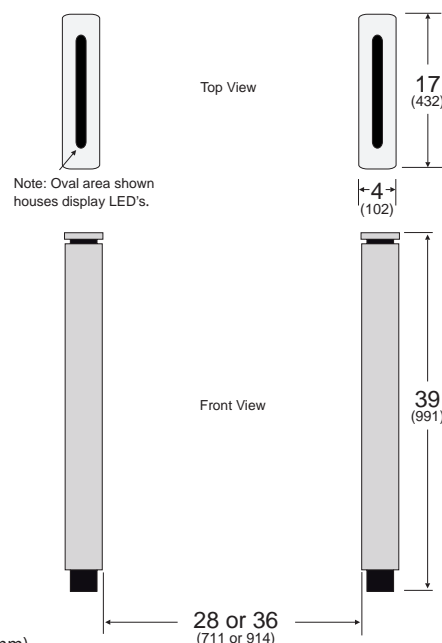

### RESOURCES

Alvarado's knowledgeable staff understands that many customers do not deal with turnstiles on a regular basis. We offer expert assistance and technical expertise to ensure the best solution is selected for your facility.

Additional information, including detailed specifications, installation manuals, CAD drawings, application images and throughput considerations can be found online.

### DIMENSIONS

Dimensions shown in inches (mm).
