THREAT DETECTION THROUGH ELECTROMAGNETICS

The **SMD600 Plus - MI2** is optimized for the screening of people in applications where **simultaneous detection of all metal (magnetic and non-magnetic) firearms and cellphone/smartphone devices**, including the most miniaturized, low metal content versions, is required along **with high-throughput and a low nuisance alarm rate**.

THE SMD600 Plus – MI2™ COMBINES

The well renowned **weapons detection and personal metallic objects discrimination performances** of the **SMD600 Plus**, 288-channel, NIJ0601.02 fully compliant Walk-Through Metal Detector (WTMD).

The **cellphone/smartphone detection and discrimination capabilities of the new MSD EVO™**, state-of-the-art magnetostatic 18-axes detector that provides unparalleled detection uniformity and immunity against interferences.

- ✓ **On its own, the CEIA SMD600 Plus WTMD is already a complete and efficient solution** for the high-sensitivity detection of any metal weapon and any cellphone/smartphone in applications, such as the correctional facilities, where the inmates to be inspected are metal free or almost metal-free.
- ✓ **The SMD600 Plus –MI2™ allows, in addition, the high-throughput inspection of visitors to correctional facilities or, in general, people in street clothes** in a standard checkpoint divestiture situation where detection of assembled/disassembled firearms and standard & miniaturized cellphones/smartphones is required with low nuisance alarm rate.
- ✓ **The SMD600 Plus –MI2™ also provides a specific optical and acoustical signaling** for either weapons or cellphones/smartphones, thus facilitating the secondary inspection performed by the security operators.
